Education

- **Mathematical analysis and mathematical methods**

St. Petersburg State University

Graduated: 2010

- **ML developer**

University of Artificial Intelligence

Graduated: 2022

- **Blockchain Developer**

GeekBrains

Graduated: 2024

Experience

System Administrator, Tax Service (2012.02.01 - 2014.08.01)

<https://www.nalog.ru>

Ensured uninterrupted operation of the server farm and storage systems, guaranteeing high availability and integrity of information for all departments within the institution. Managed the network infrastructure, including configuring and monitoring routers, switches, and wireless access points, ensuring stable and secure network connectivity. Provided technical support and conducted repairs of computer equipment, while also implementing and maintaining software to enhance user efficiency and information systems security.

Software developer, Quantum Telecom (2014.08.01 - 2018.01.01)

<https://ptl.ru>

Developed software solutions tailored to the company's internal needs, supported existing software products, and fixed bugs. Actively participated in the development of architectural concepts and strategies. Used language: php, python, perl, go. I have developed a service for storing configuration files of active network devices (Cisco, D link, Mikrotik), developed internal web applications, and participated in integration with external services. I have developed bots for telegram, viber, whatsapp and integrated them with internal crm.

Senior Software Developer, Yellow pages (2018.02.01 - 2019.06.01)

<https://www.yp.ru/>

As a Senior PHP/Go Developer at Yellow pages, I played a pivotal role in designing, developing, and maintaining high-performance web applications that powered our digital advertising campaigns. My responsibilities included optimizing and scaling existing systems, collaborating with cross-functional teams, and mentoring junior developers. I also stayed ahead of industry trends to ensure our solutions remained cutting-edge and aligned with client goals

Senior Developer, Rent Online (2019.06.01 - 2021.06.01)

<https://kvado.ru>

Software development, maintenance of current functionality, and bug fixing. Participated in the migration of architecture from monolithic to microservices. Engaged in the design and optimization of architectural solutions.

Senior Go Developer, Binomo (2021.06.01 - current time)

<https://binomo.com>

As a Senior Go Developer, I led the development of high-performance and scalable systems, leveraging the powerful capabilities of the Go language. My role involved creating architectural concepts that not only ensured efficiency and reliability but also fostered innovation and the enhancement of the company's technological landscape. We managed to participate in the development of the AB-platform, Anti-fraud service, KYC service, and cryptocurrency quote aggregation service. He was also engaged in the support of current services.

Senior Go Developer, Cryptology (2022.10.01 - 2023.09.01)

<https://cryptology.com>

As a Senior Go Developer at Cryptology, I was deeply involved in the development and maintenance of core services, cryptocurrency quote preprocessing, and the creation of innovative services that enhanced our trading platform's performance and user experience. My responsibilities included optimizing system performance, ensuring data accuracy, and collaborating with cross-functional teams to deliver cutting-edge solutions.

Hobbies

Blockchain development

Computer security

Microservices

Salary Expectations

4000 USD per month.
